## Office Action Summary

Art Unit: 1644

Amendment of 4/21/04 has been entered. Claims 1-48 are pending. Claims 1-47 are under examination.

The amendment has overcome previously stated issues as follows:

The objections to claims 1, 19-20, 24 and 46.

The rejection of claims 1-47 under 35 USC 112, 2<sup>nd</sup> paragraph.

Claims 42-47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 42 recites new matter by deleting “and separating” in step b).

Applicant’s response has offered no explanation as to why this was deleted and has not pointed to any portion of the disclosure to indicate that the recited “separating” is an optional step. Should applicant consider “can be separated” at page 20, line 26 as supporting the deletion of “separating” the examiner does not concur; “can be separated” taken in context merely refers to one of various separation methods disclosed at lines 26-31; in any case, these all involve separating. Since “and separating” is taken to be what was disclosed, by virtue of what was presented in an original claim, applicant has improperly broadened the scope of the invention.

Claims 44-47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 44, line 2 “after separating” lacks antecedent basis since “separating” has been deleted from claim 42.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Takagi (4,374,763) discloses preparation of human gamma globulin from Cohn Fract. II, by suspending the fract. in an aqueous solution containing 3-15% w/w of a monosaccharide or sugar alcohol. This solution is then fractionally precipitated with dextran.

This application contains claim 48 drawn to an invention nonelected with traverse in the reply filed on 10/6/03. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
